

AUTOMATIC BI BELT SYSTEM INTUITIVE AUTOMATIC & PERFORMANT

Fully controllable from a **tablet**, it can **quadruple the standard daily production**, creating **up to 9600 in 8 hours of work with the help of two operators**, injecting molds of very different sizes and reducing the number of defective waxes.

The AUTOMATIC BI BELT SYSTEM INTUITIVE injector belongs to the Intuitive line and retains all its features; it can inject **up to 20 molds of different sizes at the same time and per workstation by loading them automatically** and speeding up the entire production process thanks to the **self-centering function** of the molds of different sizes; it can create light and very thin objects, maintaining their weight over time.

Two Android tablets are the control unit of both the machine and the loading system, with **specially developed apps that also allow to check statistics and productivity**. Thanks to its being interconnectable to the outside world, it is compatible with **industry 4.0**.

It is equipped with a transparent melting tank with a constant vacuum system, digital sensors to control the pressures that always allow to check the graphs of the vacuum trend on the molds during injection from the tablets, RFID readers, **TC-700 coolers**, 8-cmc injection syringes with final temperature regulation and self-centering clamps with 120x90mm plates.
